DIPLOMA IN
OCCUPATIONAL HEALTH AND SAFETY

The Occupational Health Program at McMaster University, Hamilton, Ontario, Canada, offers two programs each year for this Diploma. A full-time program starts in September catering to those who wish to complete the course in three months. A part-time program is designed so that students, within commuting distance from Hamilton, can continue their normal employment; this program starts in February and with the exception of July and August, continues through to the first week of December; basically one day per week (Wednesday) but includes two extended periods of full-time study each lasting two weeks.

While special consideration will be given to those already in the occupational health field, interested individuals without such experience may also be considered. Physicians, nurses, hygienists, related professionals and others are invited to apply. A relevant university degree or equivalent is required.
